Health Service of the Canadian Medical Association

"The Road to Health is Paved With Good Prevention"

Almost everybody thinks that the older man has the need and the better job. There is a general tendency to survive seniors to look. In the mean way, many communities realize that failure to secure health for their constituents because of some local difficulties and, at the same time, attract the money of other communities to "look back". It is true that every place has its own problems and difficulties. It is equally true that the health community has succeeded, not because of lack, but because the members did what was necessary to overcome their local difficulties.

Throughout Canada you will find a great variation as to health conditions between places that may be fairly compared with each other. There is, of course, a reason for this. This reason is not hard to find. It is, in a simple way, the best health work has been done, there health conditions are best, and so on, down the scale, the health of the community corresponds to the health work being done by the community.

Every citizen should recognize the value of the health standing of his home town or country. Find out how it compares with others, ask these questions of the local or provincial health departments. Every citizen should then ask himself whether or not he has the few little things are necessary to secure the health of the community to enable the health department to pave the health road of the community with sound, progressive measures, as the citizens may travel along in happiness, free from the bumps of disease, the rate of ill-health, the sudden, unexpected ending of epidemics and the increased prevalence of preventable ill diseases.

Questions Concerning Health, as directed to the Canadian Medical Association, 184 College Street, Toronto, will be answered. Questions as to diagnosis and treatment will not be answered.

Come from those the limited work done from the men who didn't vote.

Taker Best Growers Hope for Sugar Factory

A committee of the members of the Taker Best Growers Association has been formed to promote increased best sugar in this district sufficient to meet the requirements of a best sugar factory at Taker as soon as possible. The committee is organizing steps for establishing facilities of the soil to the best possible standard for the highest "tonnage and sugar content of beets in order to increase the production of this district as greatly as possible. A car load of sugar beet has recently been shipped into the Taker district from New Orleans as presentation for the seedling of the 1928 crop.

Manitoba May Use Alberta Tar Sands

Large quantities of Alberta tar sands may be used during the coming summer in connection with the negotiations with Manitoba authorities for some time, and the plan under consideration involves the receipt of a plot of Manitoba tar sand, other plant adjacent to the front, where tar can be extracted from the sand in order to reduce the cost of transporting this tar to the oil field.

Alberta Stock Wins Prizes At Saskatoon Fair

First prize in carload lots of steers, in both heavy and light classes at the Saskatoon winter fair during the past week were awarded to Mackenzie Bros. of Lacombe, Alberta, who had three choice entries in the show. In the class for steers weighing over 1,000 pounds, grand prize went to the entry of Paul Gabriel of Kerkira, Alberta.

Lambing Starts in Southern Farm Flocks

Lambing season is reported to be well under way in farm flocks in the southern part of the province and the crop of lambs is most ones a very satisfactory. Sheep owners are taking every precaution to avoid the comparatively heavy losses which occurred as a result of the cold wet weather during the spring of 1927.

Card of Thanks

Mr. and Mrs. E. Tiltman wish to thank the Ladies Aid and Women's Institute for the beautiful plant sent to Mrs. Tiltman during her recent illness.

Hot air and cold feet are usually paid.

GOOD SEED, AND HOW TO OBTAIN IT

(By F. S. GRONDALE, Principal, School of Agriculture, Delia)

I consider it a privilege to take part in the campaign to encourage the use of better seed. It is not very often that we have the honour of backing a movement that is as sound. The movement is the result of a considerable amount of thought and careful planning on the part of a large number of leading farmers, Government officials, and the Government of the province of Alberta, and at the outset, we wish to make it clear that the better seed movement has our whole-hearted support, because we believe in the use of good seed. It is undoubtedly one of the most important of all considerations connected with successful farming.

There is no question that on the average farm, there is little of the higher seed grade seed. This is unfortunate, and creates a serious situation, for the reason that it reduces the yield and materially affects the quality of the crop produced. It would be possible to quote figures showing that there is a very large amount of inferior seed used throughout Alberta, and to show what a tremendous loss the use of this inferior seed causes in the Province. It is just an interesting fact to give something in the way of definite data on these points, but I do wish to define what, in my judgment, should constitute good seed, and to set a few simple laws to avoid producing it.

In the first place, it is important to have the right kind of seed. It applies for wheat, oats, and barley. A suitable variety is one that shows good quality and is suitable for the purpose for which it is intended. Wheat, should be of high milling quality for bread-making purposes. Oats, should be of stable quality, and of low percentage of hull. Barley of a selected variety, preferably one that would produce most successfully, and possess high feeding value.

Having the variety of quality in wheat, oats, and barley, the next consideration is to secure one that is a high yielder and one that will stand up before the fall frosts arrive.

In connection with good seed, the three qualities mentioned are undoubtedly among the most important, but they do not really include any of the points that must be within the seed sample (load), and which are of great importance. If the returns from the average farm are to be permanently improved, the points you must have in good seed are:

- (1) An entire absence of weed seeds in cereal crops. It might be permissible to have weed seeds limited quantities in some of the grass and clover seed that you use, but in the case of the larger seeds that are used, it is reasonable to expect that the average man would use only wheat, oats or barley seed that is free from weed seeds.
- (2) The seed of the cereal crops should be pure as to variety, that is, if it is Margus, it should all be Margus. If it is Ruby, or any other variety, make sure that it is pure. Any wheat seed, even though it may be of outstanding merit in other respects, would not give its maximum return unless it was pure as to variety.
- (3) Free from other kinds of seeds. When growing wheat, attempt to grow it free from barley or oats. A crop of wheat, true to kind is very much more profitable than one that is a mixture of different kinds of wheat and other varieties. This applies to crops intended for other commercial purposes as well.
- (4) Free from evidence of disease. Fungal, rust, and other diseases that lower the quality and yield of the crop.
- (5) Strong of vitality. With most grains it is impossible to determine the vitality except through the germination test and all seed should be subjected to a germination test long before it is time to begin seeding operations. The germination test may be conducted in the house, or at the Dominion Seed Laboratory, Calgary, Alberta.
- (6) It may be asked how it would be possible to procure seed that would possess the qualities and characteristics that have been mentioned. The most reliable source from which seed of high quality may be procured is from the leading seed growers and producers of the Province of the Canadian Seed Growers' Association; the Alberta Seed Growers' Association; the Provincial Seed Cleaning Plant, Edmonton; the seed houses; or from your own fields.

Registered seed, or carefully selected and selected through some of these sources, is considered to be expensive. In reality, however, it may be the cheapest seed that one could use, more it is more likely of higher quality grain in the resultant crop.

Even in the case of the farmer who can produce the seed required, it is advisable that he use some registered seed, on a well prepared seed plot, every few years. This practice enables him to maintain a high vitality, pure sample of grain.

Many farmers who have to use seed from the grain they have in their bins it is essential that it be carefully fanned and cleaned before it is sown. Clean the seed now before the spring work begins. In cleaning seed, it is important to see that the cleaning machine is properly adjusted and equipped with screens that will remove weed seed and foreign matter.

MAJESTIC AND FARREL LAKE NEWS

A large number of neighbors and friends gathered at the home of Mr. and Mrs. J. J. Campbell, Wednesday evening, March 21st, to know that at a farewell dinner, before leaving for their future home in Chicago. Had it not been for the weather, the house could have held the happy crowd, but the weather was such to prevent. The evening was spent in games and dancing, and Mrs. Campbell would be high esteem by their neighbors was demonstrated by the efforts presented during the evening. Mr. and Mrs. Campbell each receiving a large number of gifts from their friends. Mrs. Campbell also received a letter from the Majestic and Farrel Lake, of which organization she has been a member since its birth. We were met with a pleasant surprise when we played a big part in the improvement of the district, making it a little more for those who follow after. Mr. and Mrs. Campbell will always be remembered by their neighbors as true friends to their district. "A Friend is not a friend unless he is a friend in need." Their many friends will miss them very much in their new home.

Mr. John Boston is a visitor in Delia this week.

Mrs. J. McManis spent last week at the home of the Pergusons.

Mr. and Mrs. C. Ferguson arrived in Delia on Tuesday, after spending time in Calgary.

Mr. A. E. Chase spent a few days last week, the guest of Mr. and Mrs. J. McManis. She returned to Calgary on Monday.

Mr. E. Newman, Normal school will practice teaching in Majestic school during this week, under Mrs. A. E. Chase's supervision.

Mr. Hugh Campbell's sale was well attended, and splendid prices realized.

A man is also judged by the size of his wife's mouth.

Straw hats are again cheap at the wrong time of the year.

If every tooth that is pulled is a crop of fire or second class.

MILES of Low-Price Transportation

A GOOD used car is the lowest cost transportation you can buy. The unused miles of dependable service in the used cars we have on our floor at the present time offer remarkable opportunities for money-saving. The distance these cars have travelled is insignificant when compared to the thousands of miles of Unused Transportation which they represent. - - - and the prices are far below what you would expect. Let us demonstrate to you how easy it is to own a good used car.

One 1926 Coach, driven only 3,400 miles. A snap at - \$675.00

A. C. PULLAR, Delia, Alta.

GOOD USED CARS

If ignorance were bliss, everybody would be happy.

If you can't learn every minute this would be a good world.

You can't split people by sitting down on them.

Having a swallow missile is very hard on a digestion.

Farm Lands

If your farms are for sale we would have a listing of them, as we are having a good demand for farms improved and unimproved. We have had a number of buyers the last two weeks, and there are more coming.

If you want a loan on your farm we have private loans at 8 per cent.

Easter Flowers

See the beautiful Lillies, Rambler Roses, Geraniums, Spiraea, and Primulas we have in our windows.

The Kennedy Drug Co.

DELIA, - Alberta.

JOHN DEERE PLOWS

We are unleashing this week a car of Plows, direct from the factory. These plows are of new design. Sizes—two, three, and four-furrow mouldboard plows. Beams guaranteed not to bend or break. Both mouldboard and flat bottoms, which will scour in any land.

John Deere gave the world the first steel plow. They are still the best plow made—for strength, and the quality of work they do.

They cost no more. Why experiment with others?

Electrification Of Rural Areas Canada Is Being Carried Out On Increasing Scale

That electrification of rural areas in Canada will be carried out on an ever broad and increasing scale for the next few years is being well indicated by reports from cities and provinces for the future. The province of Ontario has been leading through the activities of the Ontario Electric Power Commission which was empowered to raise rates on power lines to rural areas. In the last year, more than 800 miles of lines were laid in rural areas of the province. In the last year, more than 800 miles of lines were laid in rural areas of the province. In the last year, more than 800 miles of lines were laid in rural areas of the province.

Calls Canada Great Manufacturing Centre
One Of Greatest In World Says
Lloyd-Coll Army

"Canada today is one of the great manufacturing countries in the world, and with her water power, her iron and steel, her timber, her oil, her coal, her grain, her wool, her livestock, her minerals, her scientific and technical resources, her enterprise and inventive ability, her people, there is nothing else in the world from which to draw the raw materials for the production of goods in Canada as in the United States," declared Lloyd-Coll, an industrialist in the House of Commons. Canada's growth as a manufacturing country, he said, is not limited by the strength of the war effort. He said that the strength of the war effort is not limited by the strength of the war effort.

REASON EXPORT OF EGGS HAS DECREASED
Price Is Higher and Domestic Consumption Has Increased
Canadian Egg Producers Association

Canadian egg producers have been gradually diminishing their export trade since 1927. They accounted for 10 per cent of the total supply of 6,000,000 dozen in 1927. This year the total supply of eggs was 10,000,000 dozen. The reason for the decrease in exports is the increase in domestic consumption. The price of eggs has also increased. The Canadian Egg Producers Association has been successful in its efforts to increase the price of eggs. The price of eggs has increased from 10 cents a dozen in 1927 to 15 cents a dozen in 1932. The Canadian Egg Producers Association has been successful in its efforts to increase the price of eggs.

Development Of The West
Such A Lot Has Been Accomplished In A Short Space Of Time

At Saturday night's banquet in the city of Vancouver, the speaker of the C.N.R. said that the development of the west has been a remarkable achievement. He said that the development of the west has been a remarkable achievement. He said that the development of the west has been a remarkable achievement. He said that the development of the west has been a remarkable achievement. He said that the development of the west has been a remarkable achievement.

Where Canada Spends Most
C.N.R. Made Leading Pay in Canadian Trade

An indication of the prevailing economic condition of business in Canada is given in the Canadian trade report for the month of January, 1932. The total value of the trade for the month was \$1,200,000,000. The total value of the trade for the month was \$1,200,000,000. The total value of the trade for the month was \$1,200,000,000. The total value of the trade for the month was \$1,200,000,000.

Canada Now Leads The World As An Exporter Of Wheat And Of Wheat Products

Made First Pulp Wood Paper
Nova Scotia Man Unveiled Process

Recent announcement of the plans to establish a pulp and paper mill in Nova Scotia has created the fact that it was in Nova Scotia that the first pulp was made in Canada. The first pulp was made in Canada. The first pulp was made in Canada. The first pulp was made in Canada.

Among the sold crop of Canada wheat stands supreme. No other native product has been able to compare with it as a vital industry upon the economic life of the Dominion as a whole and nothing has attracted so much attention from the outside world.
About 1875 the first wheat growing in Western Canada was reported about 1875 when the first wheat was grown in the west. The first wheat was grown in the west. The first wheat was grown in the west. The first wheat was grown in the west.

Indications are that progress in the electrification will be rapid in the future. The province of Ontario is now spreading out from Winnipeg and the Canadian provinces. The province of Ontario is now spreading out from Winnipeg and the Canadian provinces. The province of Ontario is now spreading out from Winnipeg and the Canadian provinces.
